Region and Language Configuration Guide for Non-English Operating Systems
Overview

This document gives general instructions for users to configure the Region and Language settings in Windows 7/8/8.1 for Non-English operating systems to run BAPCo benchmarks.

Three Non-English operating systems are given as examples to show the items that are adjusted or changed in the Region and Language settings of the Windows 7/8/8.1 Operating Systems. These adjustments or changes to the Region and Language settings are essentially the same for other Non-English Windows 7/8/8.1 operating systems.

For further assistance, please contact support@bapco.com. When contacting support please include the following information:

- Benchmark version
- System configuration information
- Step by step instructions for reproducing the problem
- Rate of error, e.g., 100%, 50%
- Archive of the benchmark error logs from the failing run

Locate the error folder:
C:\Program Files (x86)\BAPCo\<benchmark_name>\Results\<Project_name>\Errors\%

Locate the benchmark installation logs:

Locate the System Config Tool log (note: this file exists only if the System Config Tool was used to configure the system):
C:\Program Files (x86)\BAPCo\<benchmark_name>\bin\Results\systemconfig.txt

Archive the error folder and the logs listed above using WinZip, WinRAR, etc.
Attach the archive file to the support request email sent to BAPCo support
When reporting multiple errors, please include an error archive for each problem being reported
1.0 Configuring Regional and Language settings on Windows 7

To configure the Region and Language settings, go to the Control Panel, click on the “Clock, Language, and Region”, then click on the “Region and Language” option, and the “Region and Language” window will appear. There are four tabs in the “Region and Language” window – Formats, Location, Keyboards and Languages, and Administrative.

1.1 Configuring the Formats

1) Click the “Formats” tab, then select ‘English (United States)’ from the “Formats” drop down menu. Click “Apply” to commit the change. (See Figure 1)

Figure 1: Formats
1.2 Configuring the Location

2) Click on the “Location” tab Select “United States” from the “Current Location” drop down menu. Click “Apply” to commit the change. (See Figure 2)

![Figure 2: Location](image)

1.3 Configuring the Keyboards and Languages

3) Click on the “Keyboards and Language” tab, then click on the “Change Keyboards” button. (See Figure 3)

![Figure 3: Change Keyboards](image)

4) Next, on the “General” tab of the “Text Services and Input Languages” window, use the “Default Input Language” drop down menu and select “English (United States) –US” Click “Apply” to commit the change (See Figure 4)
1.4 Administrative Tab settings

5) Select the “Administrative” tab, and click the “Copy Settings” Button (See Figure 5)

6) In the “Welcome screen and new user accounts settings” window, verify that the “Welcome screen and system accounts” and “New user accounts” boxes are checked. Then click “Ok”

2.0 Examples of Regional and Language settings configuration

2.1 Windows 7 French Language Installation

1) Launch Control Panel and click “Horloge, langue et région” (See Figure 10).

![Figure 10: Control Panel](image)

2) Next, click “Region et langue” as shown in Figure 11.

![Figure 11: Region et langue](image)
3) Select the “Formats” tab, and then choose “Anglais (Etats-Unis)” from the “Format” drop down menu. Click the “Appliquer” button to commit the setting (See Figure 12)

![Figure 12: Format tab](image12.jpg)

4) Select the “Emplacement” tab. From the “Lieu actuel” drop down menu, select the “Etats-Unis” option and click “Appliquer” to commit the setting (See Figure 13)

![Figure 13: Emplacement Tab](image13.jpg)
5) Select the “Claviers et langues” tab. Click “Modifier les claviers.” (See Figure 14)

![Figure 14: Claviers et langues tab](image)

6) On the general tab, select “Anglais (Etats-Unis)” from the drop down menu. Click the ‘appliquer’ button and “OK” to commit the setting. (See Figure 15)

![Figure 15: General tab](image)

7) From the Region et Langue window, select the “dministration” tab and click “Copier les parametres.” (See Figure 16)
8) Under “Copier vos paramètres actuels dans” click on the check box for “Ecran d’accueil et comptes systeme” and “Nouveaux comptes d’utilisateurs” and click “OK” to exit (See Figure 17)

9) In the Region et Langue dialog (see Figure 16), click the “Modifier les paramètres régionaux” and choose “anglais (Etats-Unis)” from the drop down menu. (see Figure 18). Click OK, and reboot the system.
2.2 Windows 7 Japanese Language Installation

1) Open Control Panel window. Click to access the “Region and Language” settings (See Figure 19)

![Figure 19: Windows Control Panel](image)

2) Click (See Figure 20)

![Figure 20: Region and Language Control Panel](image)
3) The settings dialog box opens. Select the tab. Select from the drop down menu. Then click button. (See Figure 21)

![Figure 21](image1)

4) Select the tab. Select from the drop down menu. Click (See Figure 22)

![Figure 22](image2)

5) Select the tab. Click the button. (See Figure 23)
6) Select the tab, Select from the section, click button and click "OK" to exit. (See Figure 24)

7) Click the button, and the appears. (See Figure 25)
8) In the [Image], click the check box for [Image] and click ok to exit. (See Figure 26)

Figure 26

9) Select the [Image] and click the [Image] button. (See Figure 27)

Figure 27

10) The [Image] appears as in Figure 25. Next, select [Image] from the drop down menu and click “OK” button to exit. (See Figure 28)

Figure 28

11) Reboot the system when prompted.
2.3 Windows 7 German Language Installation

1) Go to the Control Panel and click on “Zeit, Sprache und Region” (See Figure 29)

![Figure 29](image)

2) Then click on “Region und Sprache” (See Figure 30)

![Figure 30](image)
3) Then in the “Formate” tab, under “Format” use the scroll down menu to select “Englisch (US)” and click “Obemehmen” (See Figure 31)

![Figure 31](image1.png)

4) Select the “ufenthaltsort” tab, and under the klueler ufenthaltsort” use the scroll down menu to select “V ereingite Staaten” and click “Obemehmen” (See Figure 32)

![Figure 32](image2.png)

5) Select “Tastaturen und Sprachen” and click on the “Tastaturen andem” to set the keyboard setting. (See Figure 33)

![Figure 33](image3.png)

6) In the “Textdienste und Eingabesprachen” window, under the “Standardeingabesprache” section, use the scroll down menu to select “Englisch (US) – US and click “Obernehmen”, then click “OK” to exit (See Figure 34)
